

Customize Images on SignalWire Using Imgur

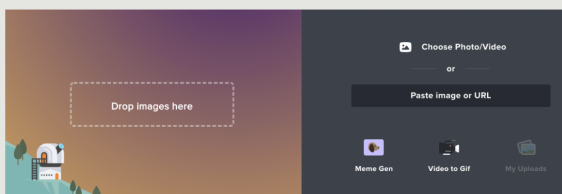

A step-by-step guide by **Securicore Inc.**

Step One

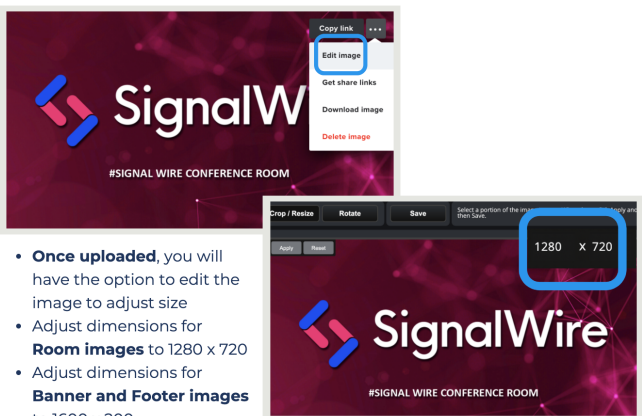

- **Log into your Imgur account** and select "New Post" in the top left hand corner

Step Two

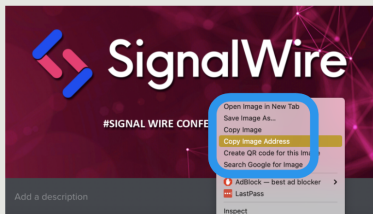

- **Drop your chosen image** into the prompted field

Step Three

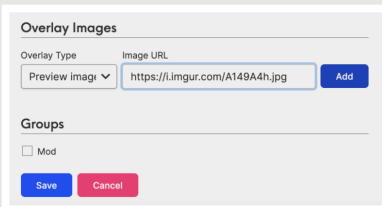

- **Once uploaded**, you will have the option to edit the image to adjust size
- Adjust dimensions for **Room images** to 1280 x 720
- Adjust dimensions for **Banner and Footer images** to 1600 x 200

Step Four

- **Once resized**, right-click on the uploaded image and select "Copy Image Address"
- **Paste the image address** into your chosen Overlay Image field in the Room editor on SignalWire
- Click "**Add**" and save your changes

Overlay Image Guide

- **Preview:** Used when people are in the room
- **Canvas:** Used on multipoint conferencing with more than 1 user
- **Empty:** Used for Empty room
- **Alone:** Used on multipoint conferencing when alone
- **Lower Thirds Colour:** Banner text colour
- **Lower Thirds Image:** Banner logo
- **Splash:** Background image in the video
- **Mute:** Video Mute placeholder
